

# PLASTIC CONSUMABLES FOR CELL CULTURE

## SYRINGE FILTER

- Pore size 0.22 , 0.45 mm , Dia. 13, 25 mm.
- Membrane : PES, PVDF
- Sterile and Non sterile

## MICROCENTRIFUGE TUBE

- Size : 0.5, 1.5, 2.0 ml
- RCF : 15,000 g
- Autoclavable

## CENTRIFUGE TUBE

- Size : 15 and 50 ml
- RCF : 12,000 g
- Autoclavable
- Sterile and Non sterile

## CELL CULTURE PLATE

- Plate : 6, 12, 24, 48, 96 well plate
- Lid included
- DNase, RNase free
- Packed in individual bags

## CELL CULTURE FLASK

- Size : 25, 50, 250, 600, 850 ml
- Material : Polystyrene
- Cap : Standard cap for closed systems and vented cap with 0.22 mm
- Tolerated Temperature Range : -10oC to 70 oC
- DNase, RNase and pyrogen free

## CELL CULTURE DISH

- Size : 37, 58, 87, 90 mm. (Dia .lid)
- Lid included
- Pyrogen free

## TRANSFER PIPETTE

- Volume : graduated 1, 3 ml
- Non sterile
- Made of special non-toxic LDPE

## SEROLOGICAL PIPETTE

- Size : 1, 2, 5, 10, 25, 50 ml
- Made of crystal polystyrene and with color coded ring for quick volume identification
- Sterilized by gamma irradiation and non-pyrogenic
- Packed individually in paper/plastic bag (peel-pack)

## MICROPIPETTE TIP

- Size 10 µl , 200 µl, 1000 µl, 5ml.
- Standard or Filter
- Box or Bulk , Sterile or non sterile
